

WANT TO ADVANCE YOUR CAREER AND LEARN MARKETABLE NEW RESEARCH SKILLS?

Explore what the **Population Health Data Analysis Certificate (PHDA)** can do for you!

Designed for those who work in health or social sciences fields, this program provides an excellent opportunity to revitalize your current career, earn professional development credits or get started in a rapidly diversifying field. This unique program offers:

- A flexible, fully online format
- A diverse set of analytic courses
- Applied Pro D training

Apply now for the Professional Specialization Certificate in Population Health Data Analysis or take up to two PHDA courses of your choice for professional development.

January to April 2020 courses include:

[PHDA02: Epidemiological Statistics](#) introduce students to the field of epidemiology and covers a variety of analytic topics not commonly addressed in elementary statistics courses.

[PHDA06: Health Services Program Monitoring and Evaluation](#) provides hands-on, project-based instruction on the concepts, processes and tools for monitoring and evaluating health services and programs. Students will explore a variety of monitoring and evaluation approaches and discuss standards of practice, ethical considerations, and continuous learning in monitoring and evaluation.

If you would like to learn more about our program, you can sign up for one of our free [webinars](#)! They will be running on October 30th and November 19th at 11:00am (2:00pm EST).

[Read what PHDA students have to say about their learning experience](#)

These fully online, non-credit courses are offered as a partnership between Population Data BC, the University of Victoria, Division of Continuing Studies and the Department of Geography.

Registration is open until January 2, 2020, subject to availability. Please review program eligibility requirements prior to applying.
